DeNoise version history

Version 2.8.4 (build 31d) released March 14, 2017:
• Minor changes to user interface to make operations clearer.
• Minor improvement to Preview mode.
• Extensive changes to manual to better explain new features.

Version 2.8.3 (build 31d) released November 14, 2016:
• Fixed bugs in batch processing.

Version 2.8.2 (build 31c) released October 31, 2016:
• Minor changes to common codebase.
• Withdrawn November 1 because of bug in batch processing

Version 2.8.1 (build 31b) released August 25, 2016:
• Removed references to defunct kagi website.

Version 2.8 (build 31a) released April 10, 2016:
• Enhancement of existing automatic tracking algorithm.
• Revised manual for new features.

Version 2.7.6 (build 30g) released March 13, 2016:
• Corrected reading of saved profiles that used old default Vinyl and Shellac.

Version 2.7.5 (build 30f) released March 12, 2016:
• Improved audio monitoring for files >48kHz.
• Improved automatic noise tracking algorithm.
• Changed normalisation of Vinyl and Shellac default noise profiles.
• Minor bug fixes.

Version 2.7.4 (build 30e) released July 19, 2015:
• Revised GUI layout & scaling.
Version 2.7.3 (build 30d) released May 8, 2015:
• Revised layout of under interface for high-resolution, scaled, displays.
• Minor bug fixes.

Version 2.7.2 (build 30c) released June 30, 2013:
• Minor bug fixes.

Version 2.7.1 (build 30b) released June 8, 2013:
• Choice of File Dialog types.
• Revised manual for new features from versions 2.4-2.7.

Version 2.6.5 (build 29f) released October 7, 2012:
• Fixed problem printing the about box.

Version 2.6.4 (build 29e) released August 31, 2012:
• Minor interface improvements.

Version 2.6.3 (build 29d) released August 29, 2012:
• Minor interface improvements.

Version 2.6.2 (build 29c) released July 14, 2012:
• Minor changes to synchronise with ClickRepair 3.8 and ClickRepairRT 1.0.

Version 2.6.1 (build 29b) released March 16, 2012:
• Minor bug fixes.

Version 2.6 (build 29a) released March 14, 2012:
• Can select sound-buffer length.
• Improved in-buffer reprocessing to take advantage of longer buffer lengths.
• Revised manual for new features of versions 2.4-2.6.

Version 2.5 (build 28c) released February 4, 2012:
• Multiple file Drag and Drop.
• Drag and Drop checks for over-writing files.
• Better integration with Mac OS X (Drag and Drop onto Application icon, etc.)
• Revisions of French and German interface.

Version 2.4.1 (build 28b) released January 11, 2012:
• Improvement to Drag and Drop interface.
• Minor bug fixes.

Version 2.4 (build 28a) released November 12, 2011:
• Can set breakpoints (see new manual, p46).
• Drag and Drop interface for single file processing (see new manual, p12).
• More robust handling of unacceptable files.
• Changes to File Dialog workaround introduced in version 3.4.2 (Mac only).
• Requests users to print registration information.
• Minor bug fixes.

Version 2.3.5 (build 27f) released June 26, 2011:
• Automatic update notification.

Version 2.3.4 (build 27e) released June 11, 2011:
• Minor bug fixes.

Version 2.3.3 (build 27d) released May 21, 2011:
• Fixed Windows bug introduced in previous release.

Version 2.3.2 (build 27c) released May 3, 2011:
• Work-arounds for problems with FileDialogs on Mac OS X.
• Minor bug files.

Version 2.3.1 (build 27b) released August 19, 2010:
• Improvements to user interface.
• Fixed bug in handling files with meta-data.

Version 2.3 (build 27a) released August 7, 2010:
• Improvement to batch processing interface.
• Sound output further revised.
• Minor bug fixes in dialogs.

Version 2.2.1 (build 26b) released April 26, 2010:
• Fixed potentially serious issue with 32-bit float format files.

Version 2.2 (build 26a) released April 5, 2010:
• Can process files up to 192kHz (using resampling.
• Facility to save and restore custom settings to file.

Version 2.1 (build 25c) released February 25, 2010:
• Enhanced batch setup allowing for more files.
• Drag and drop support in batch mode.

Version 2.0 (build 25b) released December 13, 2009
• Revised Java Sound Output features.
• Restored Mac file-association feature accidentally omitted from version 2.0.
• Minor bug fixes.

Version 2.0 (build 25a) released December 6, 2009
• Automatic noise-floor tracking algorithm.
• New bundled Java for WIndows.

Version 1.1.7 (build 22f) released August 10, 2009
• Will process AIFF files longer than 2GB.
• Java defaults updated for Mac OS.
• New launcher and installer for Windows version.

Version 1.1.6 (build 22e) released May 20, 2009
• Minor bug fix.

Version 1.1.5 (build 22d) released December 17, 2008
• Minor interface enhancements.

Version 1.1.4 (build 22c) released October 27, 2008
• Minor bug fixes.

• Minor interface enhancements.

Version 1.1.3 (build 22b) released August, 17 2008
• Minor bug fixes.

Version 1.1.2 (build 22a) released July 8, 2008
• Processing 32-bit float files (aifc type fl32, wav type 3).
• Enhanced preferences for saving files.
• Minor interface enhancements.

Version 1.1.1 (build 21c) released May, 2 2008
• Minor improvements to batch dialog.
• Minor bug fixes.

Version 1.1 (build 21b) released April 22, 2008
• Noise Floor Balance control.
• Adjusted shellac profile.
• Minor bug fixes.

Version 1.0.2 (build 20f) released March 21, 2008
• Minor bug fixes.

Version 1.0.1 (build 20e) released March 5, 2008
• Minor bug fixes.

Version 1.0 (build 20d) released March 1, 2008:
• First shareware release.
